

Solar Plant

We've taken a huge step forward in our sustainability journey by integrating solar panels across our production facilities as a part of our strategy to reduce our carbon footprint and shift towards renewable energy sources.

Total power capacity: 186 kWp

Inverters capacity: 150 kWp

Projected production/year: 205 MWh

The environmental benefits:

- equivalent to 140 planted trees
- 96.35 t of CO2 reduced
- 82 t of coal saved per year
